## Experiences

As an independent UI, UX Developer, I worked on various projects that allowed me to gain a good experience in this field.

In this context, I proceeded in two different ways:

Either I worked hand in hand with the client.

Either I was involved in agencies in close collaboration with the in house team.

Generally, I started with a "creatif-brief" to understand the needs and objectives of my clients. I then offered them creative and technical solutions tailored to the specifications, installing a work schedule and applying an agile method.

UI, UX designer & Front-end developer

Differents clients | 2014 - 2017

AMS : <http://amonservice.com/staging-test/>

Planitud' esthetics : <http://www.planitudesthetics.fr/>
